Ease Pack ERP

Innovative Packaging Solutions for the Corrugated Industry.

**This is Manjul,
Manjul does all operations manually
and keeps on wondering....**

**Why aren't my departments
working together smoothly?**

**Why are my reports always
arriving two days late?**

**Why do I always have to
struggle with this outdated
ERP system?**

**Where's my live reel stock?
Why am I stressing over
uncertainties about it?**

This is Prakash. Prakash uses Ease Pack ERP by Unitech!

Industry Specific ERP Systems

Ease Pack ERP is specifically designed for industry-specific challenges, ensuring that every process is optimized to meet the unique demands of your business. This customization enhances overall efficiency and effectiveness.

Real-Time Data Integration

Data is seamlessly integrated across all departments, providing up-to-date information at all times. This allows for quicker, more informed decision-making, reducing delays and improving operational coordination.

Streamlined Operations

Ease Pack ERP automates complex processes, reducing the reliance on manual tasks and minimizing human errors. This streamlining of operations leads to smoother workflows, increased productivity, and significant time savings.

Accurate Reporting

Ease Pack ERP generates detailed and accurate reports, giving you a clear view of your business performance. These reports are crucial for strategic planning and help you make data-driven decisions that propel your business forward.

About Us

UniTech Software Solutions, headquartered in Pune, India, is dedicated to providing cutting-edge ERP solutions for various industries. We focus on creating software that addresses the unique needs of sectors such as packaging, real estate, sheet metal components, logistics, electrical panel manufacturing, regional transport offices (RTOs), blood banks, cold chain logistics, insurance, and architecture.

UniTech's solutions are designed to streamline operations, improve efficiency, and drive productivity across these diverse fields. Our flagship products include Ease Pack for the packaging industry and Ease Build for real estate, reflecting our commitment to industry-specific innovation.

Our approach at UniTech is deeply rooted in understanding the specific challenges and requirements of each industry it serves. UniTech helps businesses optimize their processes, manage resources more effectively, and achieve operational goals by delivering customized ERP solutions. The company's mission is to provide reliable, high-quality software that empowers organizations to thrive in their respective markets

Leadership Team

Our perspective

Pratik Burhade, Co-founder & CTO

Our mission is to add real value to our customers through specialized software. In corrugation companies, daily operations, data management, and reporting are often challenging with Excel or generic ERP systems.

Identifying this gap, we developed a tailored ERP solution, incorporating feedback from factory owners, shop floor staff, and back-office teams. The impact was clear—our system simplified data management, provided tools for multi-parameter analysis, and empowered more informed decision-making. In an industry often disrupted by unorganized client demands, our ERP solution brings cohesion, enabling businesses to operate more smoothly and efficiently.

Mentored by Experts like Mr. Surinderkumar Agarwal.

Our journey was profoundly shaped by the late **Mr. Surinderkumar Agarwal**, a respected industry leader who introduced us to the world of corrugated boxes. His patience, guidance, and support were crucial in our early days, ensuring we understood the industry's complexities. Mr. Agarwal's mentorship and generosity gave us our first break and laid a strong foundation for our success. His wisdom and vision continue to inspire us as we carry forward his legacy, driving our commitment to excellence and innovation.

Guided by Expertise, Driven by Innovation

Unitech is proud to be mentored by

Mr. Ram Kumar Sunkara, whose extensive knowledge in kraft pulping, paper machine operations, and waste paper recycling from the USA and Canada guides our success in the paper-based packaging industry.

Want real-time tracking of your packaging inventory anytime, anywhere? Switch to Ease Pack ERP.

Ease Pack is a cutting-edge management software designed for the corrugated packaging industry. It optimizes every facet of your operations, from production to sales, enabling you to reduce costs and enhance productivity. Ease Pack empowers businesses to achieve operational excellence and drive growth with features like a user-friendly interface and powerful features.

Real-Time Data Integration

Ease Pack ensures you have real-time access to critical data, allowing you to make informed decisions instantly. This feature keeps you ahead of potential issues and helps you maintain smooth operations by providing timely insights into every aspect of your business, from production to sales.

Optimized Production Management

Ease Pack is made to revolutionize your production management by streamlining processes and ensuring precision in tracking and entry management. With real-time updates and efficient workflows, it minimizes downtime, maximizes output, and helps maintain the highest standards of quality, enabling you to meet customer demands efficiently and effectively.

Integrated Sales Management

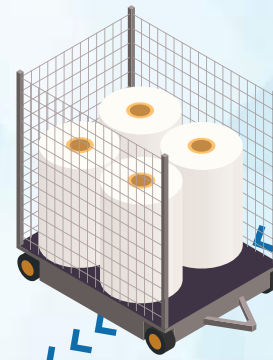

Ease Pack simplifies your sales operations by providing a seamless integration from order processing to invoicing. Its intuitive system ensures that every sales order is tracked, managed, and processed efficiently, helping you maintain customer satisfaction and streamline your sales cycle, ultimately leading to increased revenue.

Ease Pack ERP System

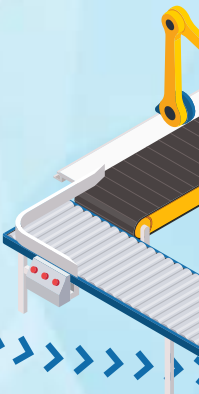

1. Material Requirement & Purchasing:

Automatically generate paper requirements from sales orders, dispatch schedules, or minimum stock levels. Seamlessly create and email purchase orders, and generate Goods Receipt Notes (GRNs), packing slips, and barcode stickers. Conduct quality checks before stock integration, and automate the billing process with tally integration for smooth material management.

2. Production Planning & Processing:

Develop Bills of Materials detailing dimensions, paper combinations, and production processes—plan production by booking sales orders and dispatch schedules. Generate machine-wise work orders for efficient operations, ensuring real-time production updates and seamless task execution for optimized production planning.

4. Dispatch & Invoicing:

Simplify dispatch with one-click E-Invoice and E-Way Bill generation. Produce Outward QC Reports, and delivery challans, and manage transporter activities. Share invoices and delivery details with clients, record transporter logs, and ensure accurate tally exports for streamlined dispatch and invoicing operations.

3. Production Line Management:

Live-record production data from the shopfloor, conduct quality inspections, and document rejections with process analysis. Track paper consumption via barcode scanning, manage transitions to finished goods, and handle production interruptions with analysis tools for improved efficiency and issue resolution.

Advanced Purchase & Inventory Control

Ease Pack offers advanced tools for managing purchases and inventory, ensuring you always have the right materials at the right time. Its comprehensive inventory management system minimizes waste, prevents stockouts, and optimizes your procurement processes, leading to cost savings and improved supply chain efficiency.

Job Work & Quality Control

Businesses can maintain stringent quality control while efficiently managing job work processes with the indulgence of Ease Pack in their operational Systems. The software provides tools to monitor and manage every aspect of job work, ensuring that each project meets your quality standards and is delivered on time, enhancing your reputation for reliability and excellence.

Customer Job Work Processing

Ease Pack simplifies customer-specific job work processing, ensuring timely and accurate delivery of services. The software allows you to track every job from start to finish, ensuring that customer specifications are met and quality is maintained. This results in higher customer satisfaction and repeat business.

One-Click Tally Export

Ease Pack streamlines your financial management by offering a one-click export to Tally. This feature eliminates the hassle of manual data entry, reduces errors, and ensures that your financial records are always up-to-date and accurate, making your accounting processes faster and more efficient.

Comprehensive Maintenance Management

Ease Pack includes a dedicated maintenance module that ensures your equipment and machinery are always in top condition. This feature helps prevent unexpected breakdowns, extends the lifespan of your assets, and ensures that your production processes run smoothly, ultimately reducing downtime and increasing profitability.

80+ Reports, Infinite Insights Your Ultimate Tool for Data-Driven Success: **Ease Pack ERP!**

Stock Reports

Live Reel Stock- Summarized views of stock with detailed valuation and history.

FG, RM, and WIP Stock- Track current positions and movement history of finished goods, raw materials, and work-in-progress stocks.

Offset Printing Stock- Monitor relevant offset printing stock for seamless operations.

Production Reports

Work Order Status- Detailed tracking of production work orders, including TAT, quantities, wastage, Required Weight, Consumption, Wastage, Profit & Loss.

Daily Monitoring & PPH Analysis- Monitor daily production, job comparisons, and specific parameters like runtime, LMT, and wastage.

Corrugation Report- Monitor specific corrugation parameters like Runtime, LMT, Average speed per minute, and wastage. You can even generate day-wise reports as

You can get **more than 80 ERP reports** that will help you shape your business properly.

Sales Reports

Summary Analysis- Month-to-month comparison of item-wise and customer-wise sales.

Pending Orders & Fulfillment- Track and compare pending orders and customer order fulfillment.

Schedule Analysis- Set and monitor dispatch targets, and analyze sale loss.

Transport Analysis - Monitor transporter and vehicle-wise trips to cross-verify the transporter bills.

Purchase Reports

Order & Quality Reports- Track pending purchase orders, and GRNs, and analyze quality variations.

Purchase Summary- Analyze material and supplier-wise purchase patterns.

Consumption Reports

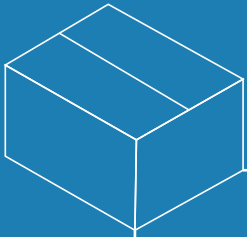

Consumption Analysis Paper &

Customer Consumption Reports-

Month-wise and day-wise analysis of paper consumption and customer value.

Rejection & Flexo Lifespan- Track in-process rejections and lifespan of flexo and dies.
