WET END INTRODUCTION

The Pro/Line is manufactured at Fosber Asia, Foshan with full support and design from Fosber's headquarters in Lucca, Italy. Thanks to the innovation design the PRO/Line wet-end still utilizes top quality technology but a much lower capital investment cost.

Pro/Line是由佛斯伯亚洲佛山制造，佛斯伯意大利卢卡总部设计、支持和提供服务。由Pro/Line湿部的创新设计使得产品仍保持高品质，同时降低了成本投入。

At the heart of the PRO/Line is the PRO/Facer multiple flute quick-change cassette single facer. With its extended nip "BELTNESS" concept and the differential design of the two differently sized corrugating rolls, the PRO/Facer significantly reduces the flute-forming labyrinth to ensure optimum flute formation and greater resulting board strength, so particularly beneficial for running lighter weight papers.

Pro/Line的核心是Pro/Facer快速换卡匣式的多楞型单面机。延长啮合的无皮带技术和不同设计瓦楞辊的大小直径，减少了瓦楞形状造成的难题，同时保证了最优的楞型和最高的瓦楞纸强度，也特别适合于低克重纸板的运作。
